

jQuery

Advanced

Ajax Experience - July 2007

John Resig (ejohn.org)

jQuery Plugins

- Extend the jQuery system
- Add on extra methods
`$("#div").hideRemove();`
- Trivial to implement

```
jQuery.fn.hideRemove = function(){  
    return this.hide("slow", function(){  
        jQuery(this).remove();  
    });  
};
```

Plugin Repository

- Hundreds of plugins
- Diverse amounts of functionality
 - Widgets
 - Language Extensions
 - Drag & Drop
 - Much more...

Building a Wizard

- A non-trivial piece of functionality
- Require dynamic interaction
 - Forms
 - Events
 - Ajax

In Come the Plugins...

- BlockUI

<http://malsup.com/jquery/block/>

- Ajax Forms

<http://malsup.com/jquery/form/>

- Tabs

<http://stilbuero.de/jquery/tabs/>
